SUMMARY

Results-driven Data Analyst skilled in converting complex datasets into clear, business-focused insights and interactive dashboards. Strong expertise in SQL, Python, Excel and Power BI, with experience in building data pipelines and tracking KPIs. Adept at collaborating with stakeholders to support strategic, data-driven decision-making.

TECHNICAL SKILLS

Programming & Querying: Python (Pandas, NumPy), SQL (MySQL, SQL Server)

Data Visualization & BI Tools: Power BI (DAX, Power Query), Excel (Pivot Tables, VLOOKUP, INDEX - MATCH)

Data Analysis Techniques: Data Cleaning, Exploratory Data Analysis (EDA), ETL, Data Transformation

Analytics & Reporting: KPI Tracking, Statistical Analysis, Business & Sales Analytics, HR Analytics

Libraries & Tools: Matplotlib, Seaborn, Jupyter Notebook

Version Control & Platforms: Git, GitHub

PROJECTS

Customer Shopping Behavior Analysis | *Python · SQL · Power BI*

Feb 2026 – Mar 2026

- Processed and transformed **3,900+ customer purchase records** using Pandas and NumPy, building a structured data pipeline to ensure high-quality, analysis-ready data.
- Developed and optimized **10+ SQL queries (joins, aggregations, window functions)** to analyze customer segmentation, product performance, and revenue trends, reducing manual reporting effort by **60%**.
- Designed an **interactive Power BI dashboard using DAX, Power Query, and data modeling**, enabling KPI tracking and business insights to track customer behavior and sales performance, identifying **top revenue-generating categories and peak purchase periods** for data-driven marketing strategies.

Employee Attrition Analysis | *SQL · Power BI · Power Query*

Jan 2026 – Feb 2026

- Analyzed **1,470 employee records** using SQL joins and aggregations across multiple dimensions to identify key drivers of employee attrition.
- Performed **data cleaning and transformation** using Power Query, resolving missing values, duplicates, and inconsistencies to improve dataset reliability and reporting accuracy.
- Built a **Power BI dashboard with critical HR KPIs** (Attrition Rate, Salary, Satisfaction Score), uncovering a **2.3x higher attrition risk** among employees with low satisfaction and overtime.

Financial Loan Performance Analysis | *Python · Matplotlib · Seaborn*

Dec 2025

- Developed an **end-to-end data pipeline** using Pandas for cleaning, transforming, and structuring loan data, ensuring **100% data completeness** for analysis.
- Conducted **exploratory data analysis (EDA)** and created **10+ visualizations** to evaluate loan performance metrics such as applications, funded amounts, and repayment behavior.
- Identified **key risk factors (employment length, loan purpose)** influencing repayment trends, enabling insights for **risk assessment and lending strategy optimization**.

CERTIFICATIONS

- Data Analysis with Python — IBM
- Data Analytics — SLA Institute

EDUCATION

Master of Business Administration

2023 – 2025

Bharathiar University, Coimbatore

Bachelor of Business Administration

2020 – 2023

Alagappa Govt. Arts College, Sivaganga
